Leo was not feeling good. He did not feel like he wanted to play. He was very tired.

When Leo felt bad, he would remember where he came from. It made him feel better. But he also missed where he came from.

He remembered leading
lions and tigers to safety.

He remembered another
family on a different
planet.

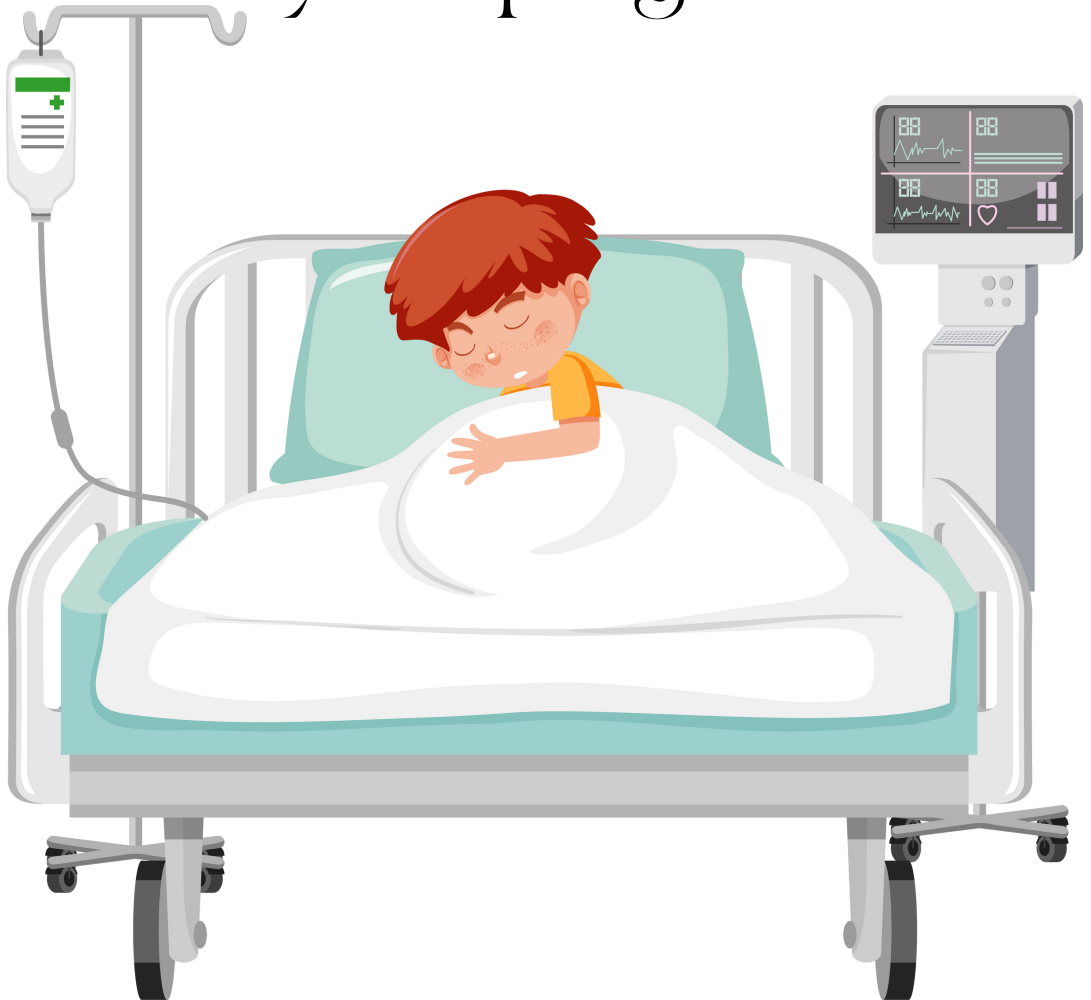

Leo mostly remembered that he was happy when he had a mission in the Universe. He missed his other family, the lions, and the triangle house he used to live in.

Here on earth, Leo was
sad.

He was feeling worse. The
medicine from the Doctor
was only helping a little bit.

Leo tried to tell his
Doctor about what he
knew. But only his
Mom would listen to
what he said.

Leo told his Mom all
about his other life and
adventures.

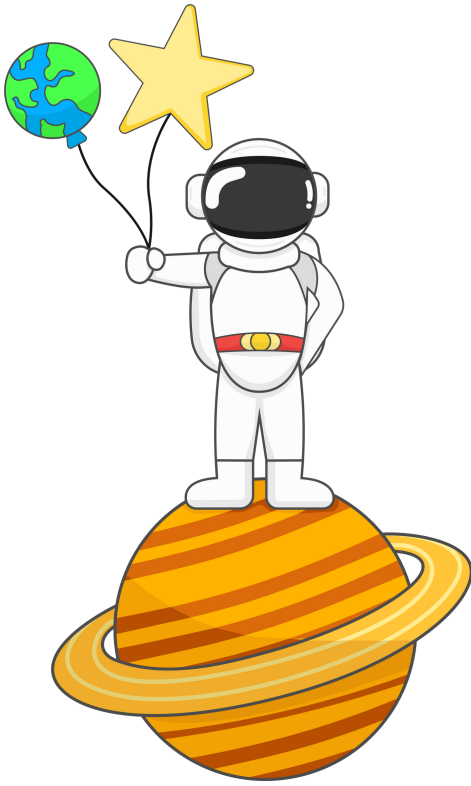

One day some fairies told
Leo that he would be well.

They told him that he
would be fine on earth,
and that he had a mission
on earth.

Leo was happy to hear this. But, he still missed his old family and his adventures of helping to free the lions from their planet that was being destroyed.

He did not know what mission he had on earth that could be as much fun as the one he remembered.

He mentioned to his Mom
what the fairies told him.

She gave him a big hug.

Leo knew his Mom loved
him, and his Dad did too.

He felt very loved and
cared for.

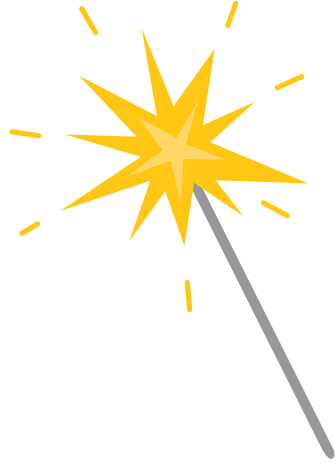

Leo's Mom started
putting love into his
water.

Leo remembered on his
old planet that there was
a lot of magical water,
filled with love.

So drinking the water,
blessed with love, was
easy for Leo.

The more of his Mom's
special water he drank, the
better he felt.

One day Leo was visited
by the lions and tigers he
knew from the past.

They came to tell him
'Thank You' for everything
he did for them and their
planet.

Then the fairies came and
told Leo that it was now
time to live on this planet.
He did not need to worry.
He could be healthy.

“But what about my mission and life before, when I was saving the Universe?” Leo asked the fairies.

“You did a great job and that mission is done.

Now it is time for a new mission. When you are a little older, we will come visit you again with that information,” the fairies said.

Leo told his Mom what the
fairies told him.

He also felt a lot better
about being on earth now.
His health was getting
better.

“Mom, do you think the water blessed with love is part of the reason I am better?” Leo asked.

“Wait, I know the answer, it is,” he said.

His Mom smiled.

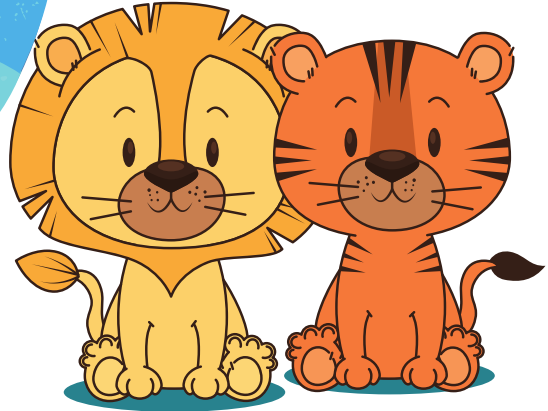

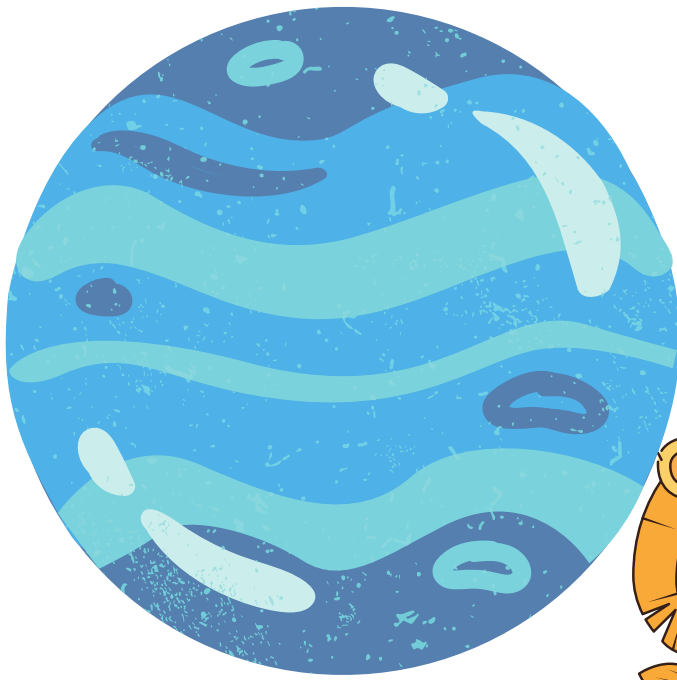

Leo knew he had more to do. He and his Mom both knew love is the answer, to healing.

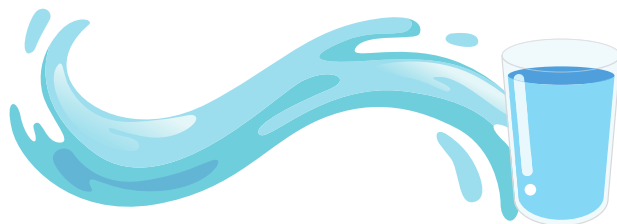

Leo gave his Mom a big hug. He still missed the tigers, lions and other family. But Leo knew he was loved and whatever happened, he would be supported here on earth.

Leo now understood that he had saved the tigers, the lions, his other family and his planet, before in the Universe, because he loved them.

And now his Mom and he
were putting love into his
drinking and bathing
water. Plus he was loved
by his earth family.

Leo knew that he would be just fine. Leo saw himself for what he was. Love.

And because Leo is Leo, he is also standing by for his earthly mission to be told to him in a few years.

He is never far from the faries, lions, tigers and the Universe, water and a loving family.

Children have a lot to share with us. They have not yet been told what to do and how to think. Many children speak to us of spirits, past lives and magical stories from their imagination.

Luckily for us, Leo's Mom did listen to his knowings. They brought her insights and remembrance. They also brought healing for Leo.

If you would like to add love to water you can send love from your heart through meditation, prayer.

Dr. Emoto did a lot of scientific study on this topic which is available in books, articles and on you tube videos.
